Lab Exercise 4

Setting up Maven Build Job in Jenkins

Objective: To set up Maven build job in Jenkins for automating the build process, enabling continuous integration to enhance the software development lifecycle

Tools required: Jenkins

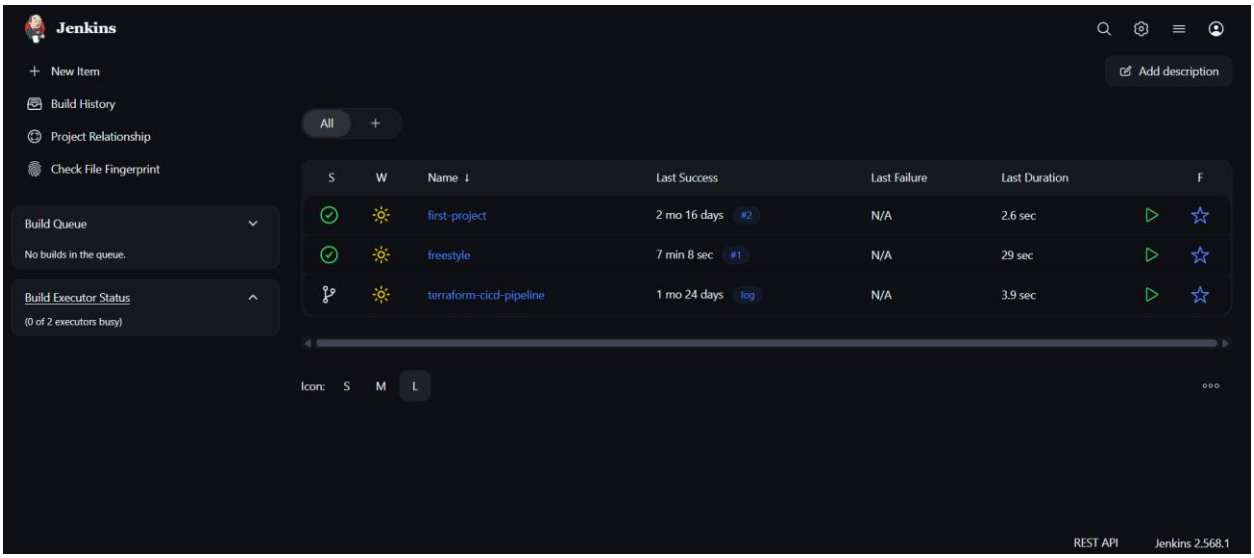

Prerequisites: You need to have a Jenkins up and running.

Steps to be followed:

1. Log in to Jenkins CI tool and configure Maven freestyle job

Step 1: Log in to Jenkins CI tool and configure Maven freestyle job

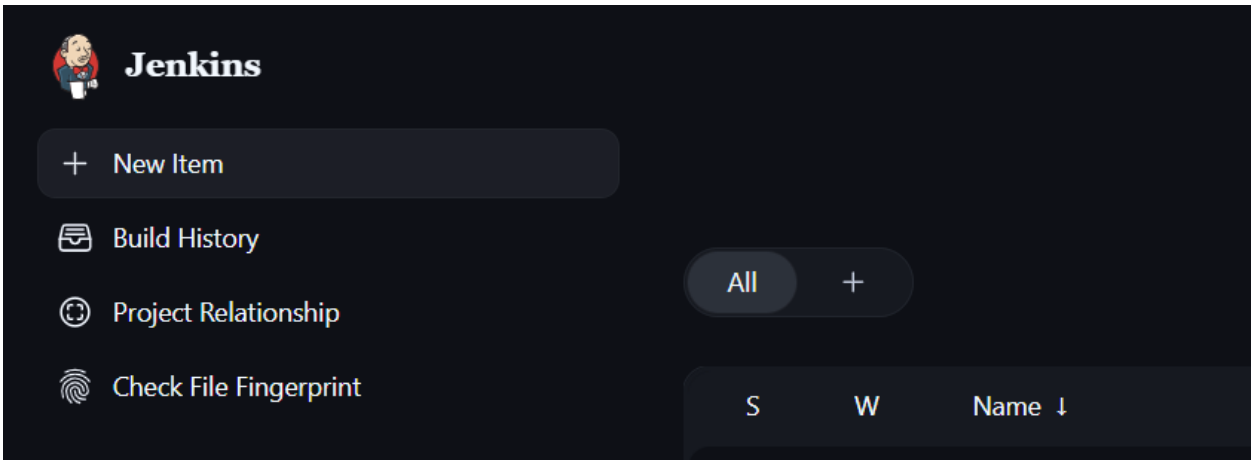

1.1 Log in to Jenkins using your credentials

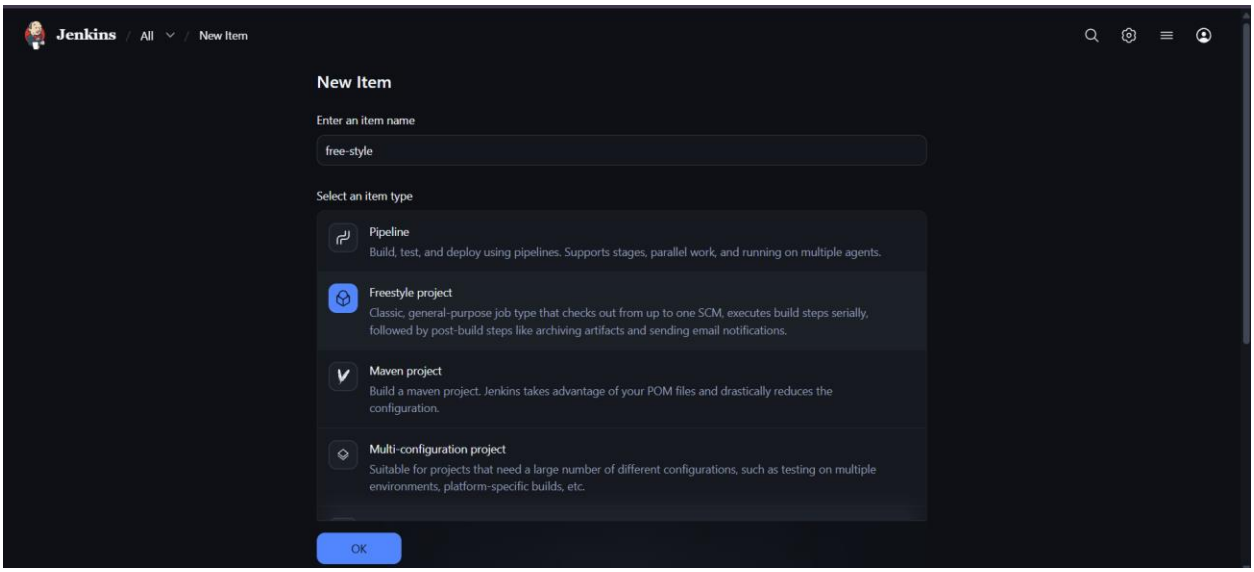

Note: The credentials for accessing Jenkins in the lab are Username: **admin** and Password: **admin**.

.

1.2 In the Jenkins dashboard, click on **New Item**

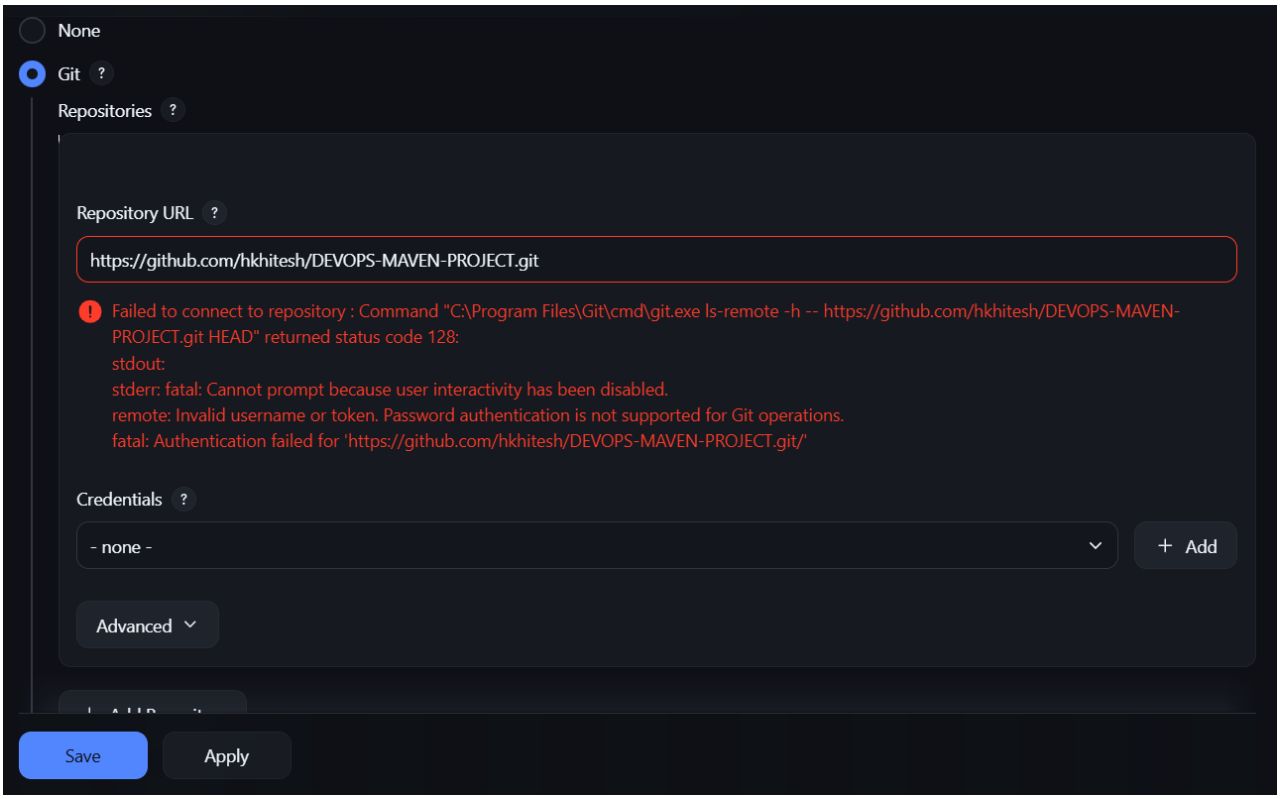

1.3 Select the **Freestyle project** while creating a Jenkins job, provide a custom job name, and click on **OK**

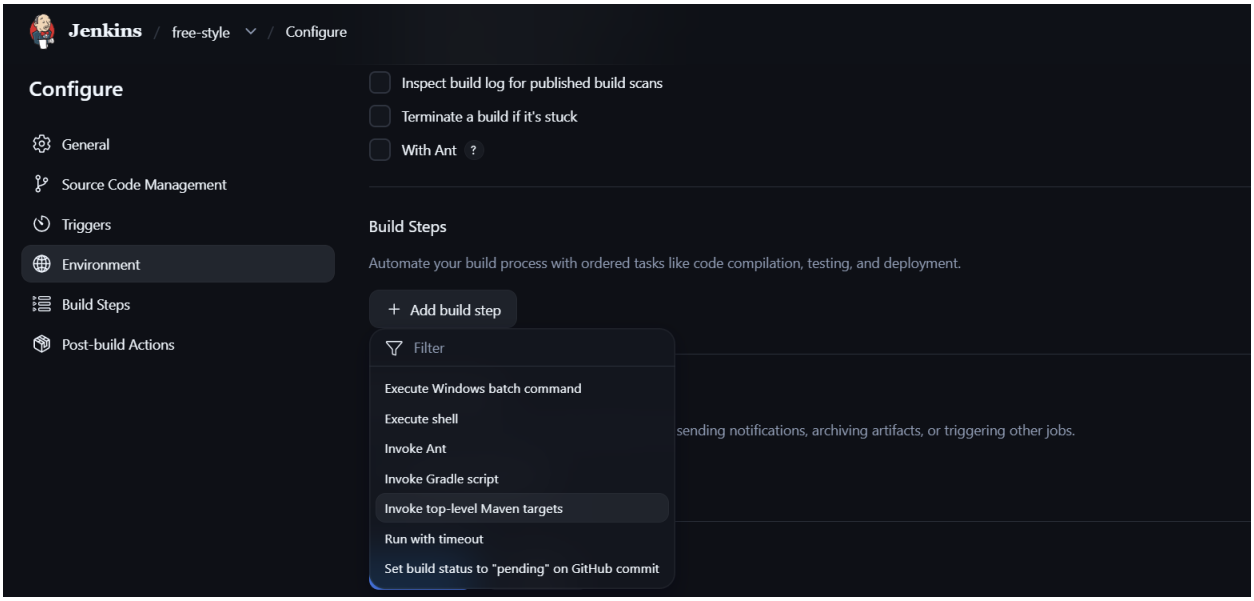

1.4 Now, in the Configure page, navigate to **Source Code Management** in the left navigation bar, select **Git**, and then provide the Git repository URL

.

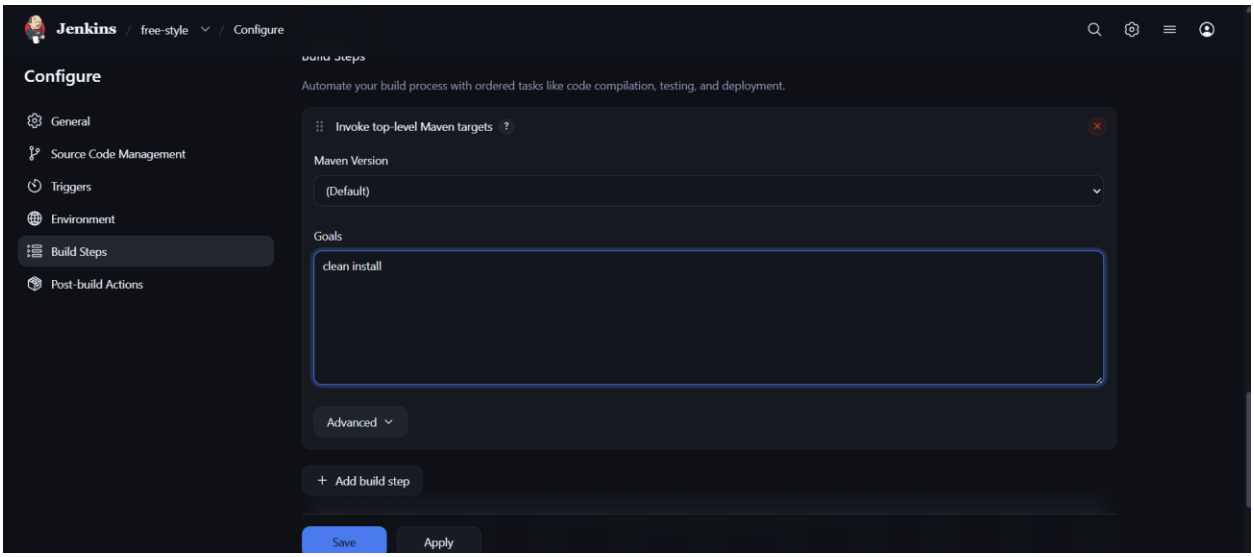

1.5 Now, navigate to **Build Steps**, click on **Add build step**, and then select the option **Invoke top-level Maven targets**

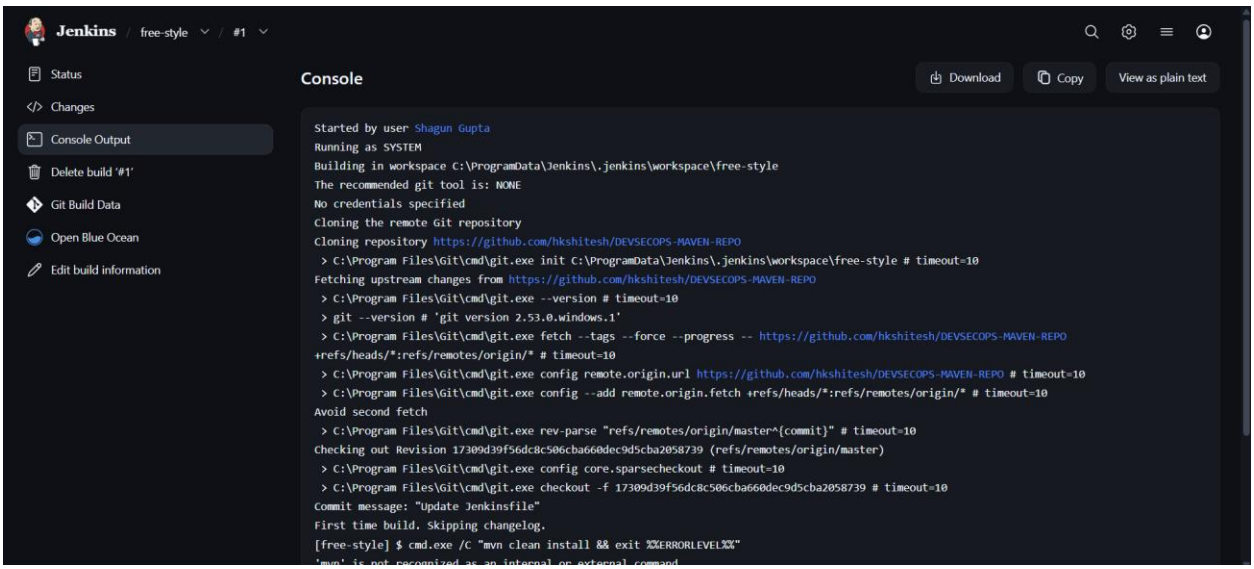

1.6 Provide clean install under **Goals** section and then click on **Save**

.

1.7 You will be navigated to the project after clicking on Save. Now, click on **Build Now** to initiate a new build, and the build logs will display the progress of the build process.

You can see that the build is configured successfully.

.

By following these steps, you have successfully set up Maven build job in Jenkins for automating the build process, enabling continuous integration to enhance the software development lifecycle.
